ABOUT ME

I'm an IT graduate who genuinely enjoys solving problems — whether that means writing the code behind a web app or getting my hands on the hardware that runs it. In my current role I do both: I keep a busy printing shop's computers, printers, and network running, and I built the web-based system the team now uses every day to track their orders. I like making things that people actually rely on, and I'm always looking for the next thing to learn.

EXPERIENCE

Technical Support Assistant

Nov 2024 – Present

Mark D' Unlimited Enterprise — Bacoor City, Cavite

First point of contact for anything technical in the shop — and, when I saw a workflow problem worth solving, the person who built the software to fix it.

- **Built & shipped:** designed and deployed a web-based Order Monitoring System (HTML, CSS, JavaScript, PHP, MySQL) — now live at mdueoms.com and used daily to track every print job from order to release, replacing paper-and-memory tracking.
- Handled first-line support for computer, printer, and network issues, keeping the shop running with minimal downtime.
- Assembled, set up, and repaired computers, and installed and configured sublimation printers — including on-site setups at client locations.
- Installed and maintained CCTV systems, and managed user accounts (setup, password resets, access control).
- Resolved many issues remotely using AnyDesk and TeamViewer, cutting down the need for on-site visits.

EDUCATION

B.S. in Information Technology

Graduated 2024

Cavite State University – Imus Campus

Technical-Vocational Livelihood — ICT Strand

Graduated 2020

Imus Unida Christian School

SKILLS

Web Development: HTML, CSS, JavaScript, PHP, MySQL

Hardware: PC assembly, troubleshooting & repair

Networking: LAN setup, IP configuration, cabling

Remote Support: AnyDesk, TeamViewer

Dev Tools: VS Code, XAMPP / Localhost, Git & GitHub, Claude Code

Printers: Sublimation & desktop printer troubleshooting

Security & Systems: CCTV setup, user & access management

Office: Microsoft Word, Excel

HOW I WORK

A genuine problem-solver — I like getting to the root of things

Reliable with deadlines and follow-through

Detail-oriented, especially where it affects real users

Comfortable explaining tech to non-technical people
